

Subject: Verification of the chain of custody of biofuels made from waste and residues, other than agricultural, aquaculture, fisheries and forestry residues.

1. The 2BSvs scheme complies, by design, with the requirement to have a chain of custody that starts from the point of origin of wastes or residues that are used to produce biofuels (ref: 2BSvs –STD 01/02 and 2BSvs-NI-Waste & Residus-2012-09-10).

2. Operators and certifications bodies are hereby reminded of their duty to cover the whole chain of custody from the point of origin of wastes or residues.

3. The implementation of that principle for the various pathways of biofuels made from wastes and residues will be facilitated with user guidelines for economic operators. Hence, user guidelines will be released progressively when they have been completed for each identified pathway.”
